

ARTESCA Validated Partner Applications

With CORE5 enterprise security at its foundation and a variety of flexible deployment options, ARTESCA is the ideal object storage for protecting your data.

Scality has tested, validated, and documented the following applications with ARTESCA:

Application	Object Lock Immutability Support	ARTESCA Validated Design	Integration Instructions
 Backup & Replication	✓	✓	✓
 Backup for Microsoft 365	✓	✓	✓
Kasten 	✓	✓	✓
 Commvault®	✓	✓	✓
 ctera		✓	✓
 HYCU® for Enterprise Clouds	✓	✓	✓
 rubrik		✓	✓
 VERITAS™ NetBackup	✓	✓	✓
 WEKA		Pending	Pending
 Zerto	✓	✓	✓
 COHESITY	✓	✓	✓

Thousands of applications support the Amazon S3 API, but not all of them support it in the same way. Different applications use different APIs, object sizes, and have different performance requirements.

To ensure the best customer experience, Scality tests, validates, and documents applications for ARTESCA. Other applications outside of the above list are likely compatible with ARTESCA, but Scality cannot verify real-world results without prior testing and validation. Discuss any opportunities for non-listed applications with your Scality channel team or email partners@scality.com.
